Health & Safety

There are clear ethical and legal reasons for having robust health and safety principles, however, Constructor Group also recognise the positive impact it has on the overall performance of the business.

There are distinct advantages for providing a safe and healthy working environment for our staff, reducing instances of accidents and ill health. It is critical we maintain appropriate levels of resources to ensure our health and safety principles are maintained within the organisation as this area is of prime importance to us.

A positive culture is encouraged within the Company and is actively supported by senior management. As our business evolves we adapt and change our processes to ensure health and safety considerations are met.
