News:

Constructor Group strengthens ties at ERF AGM

Constructor Group sent a strong team to the recent AGM of the European Racking Federation (ERF), the FEM Racking and Shelving Product Group that represents, promotes and protects the interests of the European Racking Industry.

Richard Moss is an ERF Board member and Matt Grierson was there in his new role as SEMA FEM/ERF Board representative. They were joined by Brian Howson, who is Chief Technical Officer for Constructor.

"As a leading supplier of pallet racking and associated products and services, the company plays an active role in the development of codes and standards for the industry," said Brian. "In addition to the working groups which meet throughout the year, the AGM provided a great opportunity for us help shape key priorities in terms of technical working groups and policies."

The event, which took place on the 18 October in Bilbao in northern Spain, was preceded by a dinner for delegates.
