

News:

Constructor and AL Storage Solutions exhibits at Modex 2016

MODEX 2016 “the Greatest Supply Chain Show on Earth.” took place in Atlanta between April 4th-7th 2016.

With over 850 exhibits from industry, commerce and government, showcasing the latest manufacturing and supply chain solutions and innovations, spanning across 250,000 square foot of exhibition space.

This year **Constructor** teamed up with **AL Storage Solutions** to exhibit and demonstrate our Tornado Storage machine.

The **Tornado** was filled with various elements to build Formula 1 toy cars, and delegates were encouraged to simply operate the Tornado, which would bring the trays to the opening, enabling the delegates to pick the elements and build the car, demonstrating the principles of the Tornado perfectly.

During the first two days of the event we welcomed over 230 delegates to our booth, and received over 50 new leads for automated machine projects.

We were delighted to welcome several new **dealers from Colombia, Venezuela and Brazil** where we had the opportunity to discuss promoting our products with each of them.

Stefan Lindh Business Area Manager said *“MODEX 2016 is great expo for our partner and ourselves to attend, it has enabled us to showcase our products to new and prospective customers”*.
