Materials Handling Middle East 2015 Exhibition

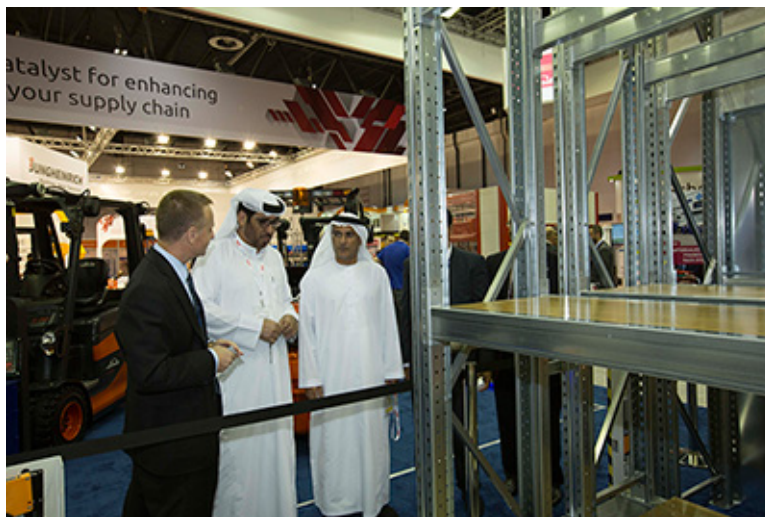

FAMCO, the authorized Constructor Group distributor in the Middle East exhibited the DEXION **TORNADO Vertical Lift Machine** and **MOVO** mobile racking system at the Material Handling Middle East, the largest exhibition for the Logistics industry in Middle East in September.

The booth attracted much interest, particularly in the Tornado Lift Machine which is made for fast & accurate picking, while delegates also expressed strong interest in MOVO for heavy duty warehouse applications. During the exhibition, both were demonstrated live to enable visitors the opportunity to fully understand their solution potential. For both Famco and Constructor Group the exhibition was a great success.

Delegates had the opportunity to discuss with Constructor Group and FAMCO latest solutions and participate in demonstrations of the TORNADO Vertical Lift Machine and MOVO mobile racking system among other products in the range.

With efficiency, speed, safety, and low maintenance; TORNADO and MOVO prove to be storage solutions of choice for Aerospace, Government, Transportation, Manufacturing and Warehousing. TORNADO and MOVO are easily integrated with existing Warehouse Management Systems (WMS) and can also be used as standalone systems.

FAMCO is the largest equipment company in Middle East and Africa with Material Handling as one of its industry verticals. FAMCO's Material Handling Solutions can be found in a majority of the industrialized projects across the region. 20% of all warehouses are built using FAMCO.

FAMCO's industry verticals include heavy vehicles and machinery including trucks, buses, construction machinery, marine engines, air compressors and diesel generators which are distributed using over 30 brands in over 10 countries.
