

Constructor Logistics

Constructor Logistics deals with internal logistics development and supply of the **Warehouse Intelligence System (C-WIS)**. The core competence is built around our expertise and knowledge in internal logistics and the self developed C-WIS application. We focus on capital rationalization, material handling optimization and give our clients a sustainable warehouse in sync with reality.

A C-WIS project helps our clients to significantly free tied up capital and optimize handling in the warehouse.

We focus on capital rationalization, material handling optimization and give our clients a sustainable warehouse in sync with reality.

Constructor Logistics is offering its service and C-WIS application across all industries, where there is identified problems with:

- Article administration
- High order line cost
- Performance in the warehouse
- Poor service degree
- Need for changes of design and layout of the physics in the warehouse

A C-WIS project with belonging installation is very cost efficient and has a pay back as from few months.

Constructor Logistics is owned by and operates through Constructor Group.
