

Service/ Maintenance

Constructor Group believes that its commitment to its customers does not stop after our products are delivered and installed. We aim to continue to work with our customers in providing ongoing support in terms of the maintenance and servicing of our products. In many cases there is a legal responsibility on our customers to ensure that our storage products are regularly inspected and maintained to guarantee an ongoing safe operation. Utilising our skilled engineers we can provide this service and carry out any remedial work that is required to make sure our customers operation continues to operate efficiently and safely.

Constructor Group can;

- Offer a maintenance or service contract to meet our customers specific requirements
- Carry out maintenance in accordance with the service plan
- Use certified service technicians
- Systematic follow-up of inspections and repairs
- Upgrading the existing facilities with repairs or new technology
- Monitor and follow up existing legislation, regulations and norms
- Training of customer staff in the use of our equipment

Constructor Group is always ready and available to help our customers in the safe and efficient operation of our products.
